Rescue crews in New York work to free 17 miners trapped in elevator shaft

(Reuters) Rescue crews in upstate New York were working on Thursday to free 17 miners trapped about 800 to 900 feet down an elevator shaft at a salt mine, officials said. The miners became trapped around midnight local time when a lift malfunctioned at the Cargill Salt Mines in Lansing, a town of about 11,000 people near Ithaca, the Tompkins County Department of Emergency Response said. Emergency crews have been in contact with the 17 miners via radio and there were no known medical emergencies, local broadcaster WTEN-TV reported. Technical Rescue experts and equipment have been called to the scene to help rescue the workers, emergency officials said. According to Cargill's website, the Lansing mine processes approximately 2 million tons of road salt that is shipped to more than 1,500 locations throughout the northeast United States.

Iran accuses Saudis of bombing embassy in Yemen

(BBC) Iran has accused Saudi-led coalition warplanes of "deliberately" bombing its embassy in Yemen's capital, Sanaa. State media quoted a foreign ministry spokesman as saying members of staff had been wounded in an air strike. Sanaa residents reported dozens of air strikes on Thursday by the coalition, which is battling Houthi rebels. A coalition spokesman said the air strikes had targeted rebel missile launchers, and that the rebels had used abandoned embassies for operations. Saudi Arabia has become embroiled in a diplomatic row with Iran after a Shia cleric, Nimr al-Nimr, was executed by the Saudi authorities. The government in Riyadh accuses Iran of supporting the Houthis militarily - a charge it denies.

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

A series of offshore low pressure systems and frontal boundaries will produce periods of rain, high elevation snow, and gusty southerly winds through Saturday. Breaks in precipitation are expected this morning, Friday, and Sunday.

Medford Weather:

Precipitation has ended over most of extreme Northern California this morning as expected leaving residual low level cloudiness. Fog is also forming in many valley locations.

Reno Weather:

A broad area of low pressure continues to provide light snow showers across the Sierra. Accumulations have been generally less than an inch since last night. The best potential for snow showers will shift eastward out of California this afternoon.

San Francisco Weather:

Showers continue this morning but will decrease in coverage this afternoon. High pressure briefly builds tonight into Friday with only isolated showers and cool temperatures. Next front then arrives Friday night in the North Bay with rain returning and overspreading the rest of the Bay Area and Central Coast into Saturday morning. Showers end by Saturday afternoon with a brief return of dry weather Sunday. Next front arrives Monday with another chance of rain followed by another system currently timed to arrive next Wednesday.

WEATHER

WEATHER SYNOPSIS BY REGION:

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:

Sacramento Weather:

Lingering showers remain today with relatively dry conditions on Friday. More rain and mountain snow on Saturday. Brief break on Sunday then return to a wet pattern Monday through the middle of next week.

Hanford Weather:

Strong Pacific storm system will continue to bring rain and mountain snow to Central California through the remainder of tonight. A succession of storm systems tracking eastward from the Pacific will follow and bring wet weather at times to much of the Central California interior for the remainder of the week.

SOUTHERN CALIFORNIA:

Los Angeles weather:

Scattered showers and isolated thunderstorms will continue today. Friday will be dry, but another weaker front will bring light rain Saturday. The unsettled and cooler-than-normal weather will persist into next week.

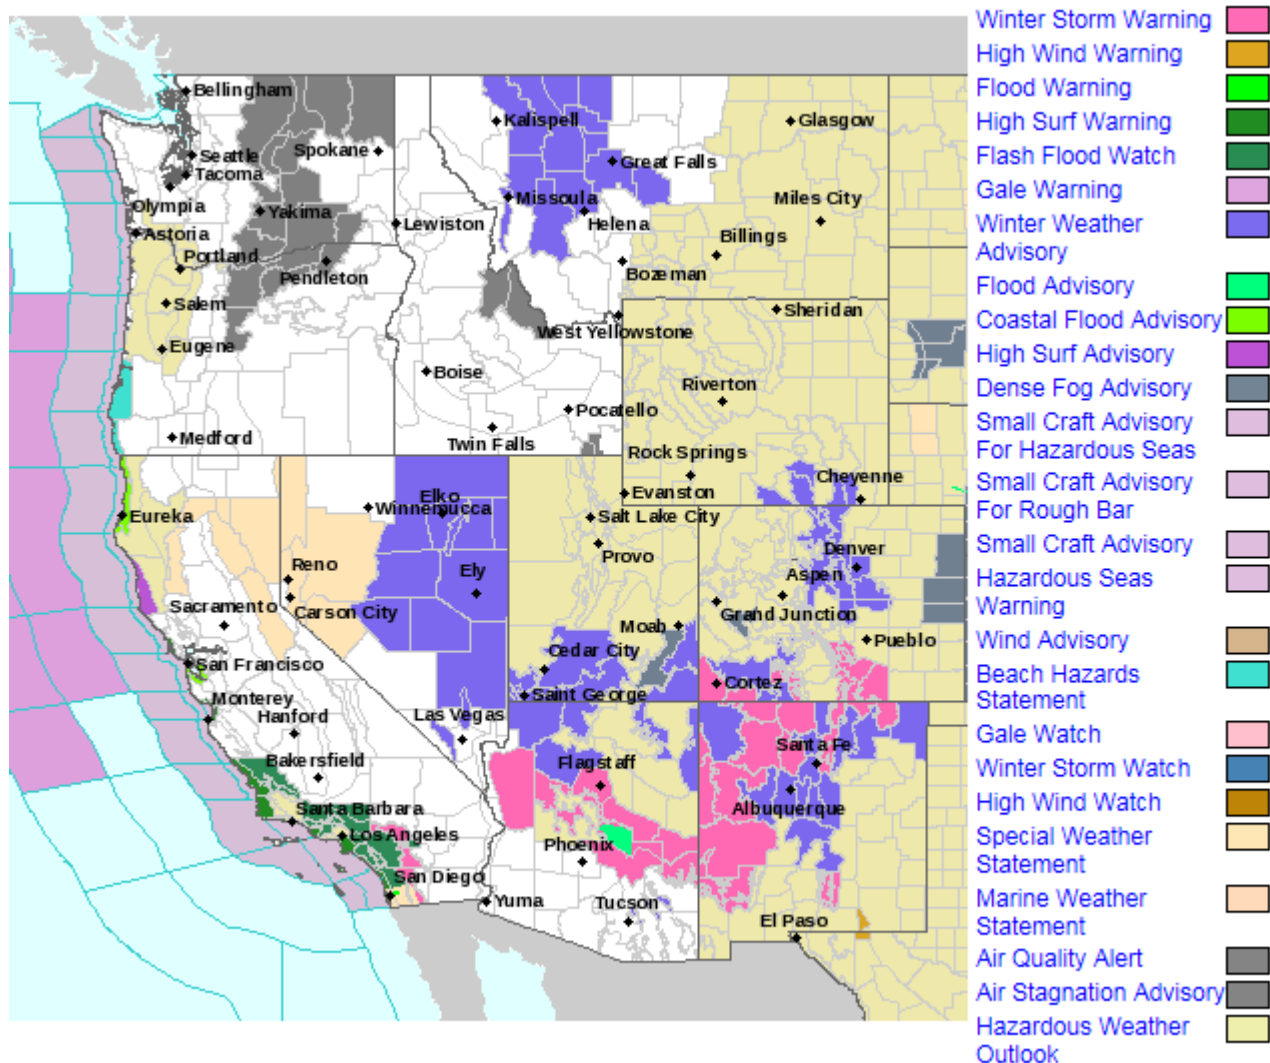

Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

Showers will gradually decrease through Friday or early Saturday with weakening winds on Friday. Another low pressure system is expected to bring gusty winds and more precipitation for late Saturday into Sunday. Dry for Monday with small chances for precipitation on Tuesday from a weakening low pressure system to the north. More precipitation and gusty winds is possible for late Wednesday through early Thursday from yet another low pressure system.

Southeast California Weather:

The system will move out of the area tonight with another system bringing more unsettled weather conditions to Southeastern California over the weekend.
